LOGNOTE -- Chief, Operations Group, 24 July 1985

3. (Schreiner) [] and I met briefly today with []
Okinawa Bureau logistics officer, during her brief Headquarters
TDY. (She earlier had met with ED/FEB to go over several equipment
and logistical issues.) We discussed in very general terms the
initial steps being taken on Okinawa's recapitalization program,
and I showed her a recent lognote summarizing my discussions with
[] C/RE&CD, following his visit to Okinawa. Dave had
recommended that Susan might be the best person at the bureau to
be the recapitalization project officer; Arthur and I told her to
mention to [] that we had no problem with that proposal.
We also asked her to do her utmost in negotiations with the Corps
of Engineers to get the best housing possible and not to settle
for the minimum standard. We also encouraged her to keep us
informed on negotiating progress and on overall project development
on a regular basis. She promised to do so. She's an impressive
young officer who seems genuinely interested in the recapital-
ization program. It's easy to see why [] was so impressed
with her.
